"Walt Whitman, back in the 19th century, was all about inclusivity and celebrating different voices in a democratic society. Let's talk about why inclusivity is so important in today's democracies and how Whitman's ideas can help us make sure everyone's voice is heard and appreciated. Should modern democracies make inclusivity a top priority, and if so, how can they actually make it happen despite the social and political challenges we face today?"

Yes, modern democracies should prioritize inclusivity because it ensures that all citizens' voices are heard, respected, and valued, which strengthens social cohesion and legitimacy. Inclusivity promotes diverse perspectives and helps address inequalities that can threaten social stability. Drawing from Whitman's ideas of celebrating different voices and embracing diversity, democracies can promote inclusivity by implementing policies that promote equal representation, protecting minority rights, and encouraging open dialogue. Despite social and political challenges like polarization and systemic bias, democracies can work toward inclusivity by fostering education on diversity, creating platforms for marginalized groups, and actively resisting discrimination, and making inclusivity a top priority helps build stronger, more equitable societies where everyone's voice contributes to the collective good.

Whitman maintained a hopeful outlook for the future, emphasizing the crucial role of literature in shaping societal values and fostering a democratic spirit and believed in the importance of diverse voices and individualities within a truly inclusive democratic framework, urging a continuous striving towards a more perfect union where every voice is heard and appreciated.

Whitman believed democracy requires constant struggle for inclusivity, challenging misinformation and historic marginalization. It isn't easy, but as Whitman might remind us, the powerful play of democracy goes on, and each of us may contribute a verse: "NO AMNESTY" and "FREE PALESTINE".
